

PLANTING TREES FOR THE FUTURE

In the coming weeks, the City will be planting a tree in the municipal right-of-way of your property. This planting is being carried out as part of the City of Vaudreuil-Dorion's goal to restore greenery for the purpose of enhancing its territory. This year, your neighbourhood was chosen for this project.

The selection of tree species is made according to the conditions and factors related to biodiversity as well as the assessment of the environmental conditions and constraints for each address.

The care of the new tree will be entirely provided by the Public Works Department for the rest of its life.

A tree has several ecological benefits, including its ability to improve air quality, reduce noise and heat islands, and add beauty to a sustainable living environment.

Species of the tree to be planted: _____

Vaudreuil-Dorion
