

FOR IMMEDIATE RELEASE

New Recycling Collection Schedule starting in Vaudreuil-Dorion as of January 1st

Vaudreuil-Dorion, December 5, 2019 – The City of Vaudreuil-Dorion wishes to inform its citizens that starting January 1st, the collection of recyclable materials will be carried out on Tuesdays for the area west of Exit 28 on Highway 40 (Harwood Blvd.), and on Fridays for all other areas. This change was necessary because of a new contract that was awarded by the MRC of Vaudreuil-Soulanges, which oversees recycling collection for the region's 23 municipalities.

The City of Vaudreuil-Dorion took this opportunity to review the divisions across the territory, which differed according to the type of collection (branches, recycling, waste, food waste and bulky waste). This is what led the City to decide upon one single geographical area broken up into five sectors, for all collections. The corresponding map is available on the website, and will no doubt make it simpler for residents to stay informed about the collection schedules.

Remember that the Website Search by Address Tool remains the best method to obtain any information about a residence. In addition, all collections have been added to the 2020 municipal calendar, which will be distributed in the mail by the end of the year.
