Recyclable materials: *Le Coach du bac* in conference at the Opticentre

Vaudreuil-Dorion, March 21, 2022 – The City of Vaudreuil-Dorion invites its population to attend a conference offered by the non-profit organization Tricentris this Thursday, March 24, at 7:00 p.m. at the Opticentre St-Jean-Baptiste (145 Harwood Boulevard). Gregory Pratt, aka the *Le Coach du bac*, will discuss, among other things, the materials accepted in the collection and the myths of recycling.

In 2022, the use of the blue bin seems to be well integrated in the daily life of most citizens. However, 12% of the recycling bins inspected last summer by environmental awareness officers contained contaminants, i.e. things that should not be in the collection. These errors in materials management, whether intentional or not, have an impact on the work of employees at the sorting center.

People interested in attending this presentation must pre-register at environnement@ville.vaudreuil-dorion.qc.ca. A second lecture is scheduled for April 11.
