FOR IMMEDIATE RELEASE

Vaudreuil-Dorion obtains the Healthy Enterprise certification

Vaudreuil-Dorion, March 28, 2022 – The City of Vaudreuil-Dorion is proud to announce that it has obtained the *Healthy Enterprise Level 1* certification. Thanks to its actions and achievements in terms of health, safety and wellness in the workplace, the workplace stands out.

By completing the seven steps leading to the *Healthy Enterprise Level 1* recognition, the City has embarked on the path to healthy organizational performance, a concept that allows for the combination of greater health and wellness with improved productivity within the organization. The City of Vaudreuil-Dorion thus joins the 40 or so organizations in Quebec to have obtained the certification since 2018, all levels combined.

"In the past years, we have implemented several programs to ensure the health and safety of our employees. The municipal administration has made this a priority. This was also evident when we worked on the 2020 > 2025 strategic planning *Habité par ma Ville* - employee component. More than 150 employees participated in consultations and shared their ideas. This process resulted in a document that is intended to be our internal framework. One of the aspirations is to promote healthy living within the organization and to be a leader in health, safety and wellness in the workplace. Obtaining the *Healthy Enterprise Level 1* certification confirms that, thanks to the involvement of our employees, we are creating a healthy and dynamic work environment. I would like to congratulate the employees who make up the Healthy Enterprise Committee; their boldness, openness and commitment are important to our organization," said Olivier Van Neste, Director General.

The Healthy Enterprise Group supports leaders in building healthy and wellness-friendly workplaces, thereby contributing to economic and societal development.
